20160104 CSO-SWO Phase I Evaluation Recommendation Report Rev. 1 RLSO.pdf

...

Good Evening Alice,

Please see attached for both a clean (complete with appendices) and RLSO (report text only) version of Revision 1 of the CSO/SWO Phase I Evaluation/Recommendation Report, which was revised based on USEPA comments received November 2015. Please note that during the process of revising this report, we noticed that one of the selected sample collection method conclusions depicted in WS #11 was inconsistent with the language used in the body of the Report. We corrected this issue, and Revision 1 depicts the change in selected sampling method for SVOC SIM. The following preferred sample collection method conclusion was changed for SVOCs SIM:

Original Rev 0. of the Recommendation Report:

	Event 1, Attempt 2	Event 2, Attempt 2
Primary	LSM/HSM	inconclusive
Duplicate	inconclusive	inconclusive

Revision 1 of the Recommendation Report:

	Event 1, Attempt 2	Event 2, Attempt 2
Primary	HSM	HSM/LSM
Duplicate	HSM	inconclusive

Please let me know if you have any questions.

Thanks

Brian Mikucki
